POLYOL FORMULATION

ABSTRACT

10 The invention relates to a polyol formulation for
preparing high resilience foam, which polyol
formulation contains (a) a polymer-modified polyol
formed by polymerizing an olamine with an organic
polyisocyanate in the presence of a polyol, (b) a
polymer-modified polyol formed by polymerizing one or
15 more ethylenically unsaturated monomers in the
presence of a polyol, and optionally further polyol.
The invention also relates to a process for preparing
a high resilience foam using such polyol formulation.
